

DENNIS T. KONDO - Specials

Corner Tables

These special tables are used in conference rooms and offices for telephones, displays, literature, etc. The tops are 22" w x 22" w. The curved front edge is a full bullnose, in impact resistant, black vinyl. The top face is a black, suede finish, high pressure plastic laminate. The black epoxy coated, round steel column legs are 2-3/8" dia x 28" h and have full width, black, adjustable leveling glides.

Support Panel Legs

These special support panels are used where there are special work surface height, depth or reinforcement requirements. The legs connect to anywhere on the bottom of a work surface and do not require an attachment to either a wall or a system panel. They are reversible. The legs have two adjustable glides and a 6-1/2" high cutout, for the clearance of a cove base or an electrical raceway.

Specifications are subject to change without prior notice. Field installation is not included. If you have any questions, please do not hesitate to contact us.
